Kerosene is restricted and gasoline forbidden for civilian use. New permanent barracks have been erected at the following places:

- a. Basarabi (near Calafat), two kilometers west of Basarabi railroad station. The 25 Motorized Brigade is located here. About 2,000 men are living at the old barracks in Basarabi. Recent enlargements have been made for seven hundred men. In Basarabi there are about 40 tanks, old-type cannon with non-revolving turrets. Five new warehouses are still empty; three canteens have been erected. The size of the canteens and warehouses is 25 meters by 12 meters. The tank workshop is 92 meters by 25 meters.
- b. Constanța VII (vineyards) near Gruber beer garden.
- c. Constanta Nord road to Tulcea, two hundred meters west from road and seven kilometers from Constanta.
- d. Corbul de Sus, 12 kilometers north of Navodari.
- e. Schitu, between Constanta and Mangalia.
- 8. Between Basarabi and Valul Traian station en route to Constanța, in a forest, are underground munitions dumps. The guards are dressed in Rumanian sailor uniforms, believed by informant to be a deliberate effort to confuse the observers since uniforms are sometimes exchanged on guard in various areas.
- 9. In same area above, the War Ministry has ordered five new underground gasoline storage tanks. Plans for storage tanks are kept under lock.
- 10. On 18 July 25 trucks were seen with a load of wireless sets (extra machinery was covered) en route from Constanta to Basarabi. During the second half of July one train of 30 cars filled with Soviet weapons and vehicles was observed. The general impression is that they were en route to Bulgaria.
- 11. From Constanta southward to Mangalia, sections of wooden walls have been erected where necessary to hide construction activity. Passes are needed in the area. It is believed that coastal guns on railroad carriages are located in the area.
